

Packo Surface Treatment

Packo Surface Treatment is specialized in the mechanical, chemical and electrochemical surface treatment of stainless steel. This year we celebrate our 40th anniversary. Serving customers in all domains and applications is our vocation.

Our customers appreciate our surface solutions for even the most complex functional, operational and aesthetical problems. Almost all dimensions can be treated.

We offer a wide variety of finishes and treatments:

- Electro-polishing
- Pickling and passivation
- Derouging
- Glass and ceramic blasting
- Micro peening
- Degreasing and cleaning
- Micro-undulation, low friction loss
- Non-fingerprint treatment
- Amorphous finish

- Air cushion effect finish
- Non-stick surfaces
- Hygienic, sterile and pharmaceutical finish
- Anti-bacterial finish by amorphisation
- Grinding and mechanical polishing to roughness
- Mirror polish
- Soft tone polishing, low gloss
- Deburring
- Deblackening, chemical deblackening
- Descaling

- Satin gloss Mac book finish
- Silver gloss finish
- Non corrosion finish
- E-polidur hardening, non-galling, anti-wear
- Refurbishment, repair and revision of used material
- Certificates
- Consulting and advice.

Innovative Stainless Surface Solutions for clever users.
